

Butane fuel canister 150ml/70g

Features and Benefits:

- 1) Butane fuel canister are filled with flammable liquefied gas. We attached a spring type safety valve to release the cartridge's vaporized gas, focusing on usersafety.
- 2) The safety valve helps users avoid damage from an accidental fire or explosion while using gas appliances with our company's butane gas cartridges.
- 3) The valve operates when the 8 ounce butane fuel canisters's pressure is increased by any external factor, such as fire. Through the safety hole, vaporized gas will be released to maintain the canister's normal pressure.By this process, the canister can be ready for reuse after the pressure is returned to normal.
- 4)Higher propane content for even more heat and power.
- 5)For use at lower temperatures.
- 6)Stable Mix Gas.

Product Details:

Our Service:

1. Reply in 24 hours.
2. Customized cylinder color, cap type, valve model no. And stamping is accepted.
3. Every cylinder will be tested before the delivery.
4. Delivery on time and excellent after-sales service.
5. High quality, reliable price.

About us:

Product name:Fuel energy empty tinsplate safety butane gas canister for portable stove use with high quality cheap price.

Our company was established in 1987 which is specialized in manufacturing LPG steel cylinder and accessories . Annual production capacity is 2,000,000 pieces.
