

Butane Gas Stove

Product Description:

1. Butane Gas Stove portability and Convenience:

Stainless Steel and Aluminum Alloy combine to create one of the lightest and most portable camping stoves on the market. The included carrying case further adds to the portability as Butane Gas Stove can simply be tossed in a bag without worry.

2. Butane Gas Stove Quick to Ignite and Consistently Strong:

Piezo Ignition system allows for the Etekcity Ultralight Camp Stove to have a quick ignition and a with a strong valve connection the flame stays consistent and strong even when adjusting from high to low settings.

3. Always Practical:

The Butane Gas Stove is strong, but light, resulting in a very fuel efficient flame that can make a disposable butane canister last for days. The stovetop also accommodates for up to an 18cm diameter pan.

Product Details:

Ammonia	
Physical Properties	
Molecular formula	NH ₃
Molecular weight	17.03
Boiling point 101.3Pa(°C)	-33.5
Freezing point 101.3Pa(°C)	-77.7
Density 30°C(kg/m)	-
Critical temperature(°C)	-
Critical pressure(MPa)	-
ODP	0
GWP	0
Quality Index	
purity	≥99.9%
Water content	≤0.001%
Acidity	≤0.00001%
Evaporation residue	≤0.01%
Chloride content	≤0.0001%
Appearance	Colorless and clear
Odor	-

We are looking forward to cooperating with customers all over the world. The demand for Butane Gas Stove will continue to increase.

We can work together to produce high quality Butane Gas Stove. If you want to get high quality Butane Gas Stove please contact us immediately!
